ABOUT VLC PACKAGING

VLC Packaging Joint Stock Company is a member of the VLC group based in Hai Phong City, Vietnam. Established in 2010, now VLC has become a main player in the plastic packaging industry in Northern Vietnam.

The VLC factory is located in the Trang Due Industrial Zone, An Duong District, Hai Phong City. The location's proximity to the main highways and Hai Phong seaports help us to make fast and cost-effective deliveries to our customers worldwide.

We provide packing solutions to various industries including agriculture (animal feeds, fertilizer, fruit, vegetable, and marine-related products) food industry and flood control packing. Our products portfolio consists of the most common types of bags: polypropylene woven bags/fabrics, laminated bags and BOPP/kraft laminated bags.

Our imported machines and equiments are built and assembled with advanced technologies and expertise from Germany, Swisserland, Taiwan and India. The production process is fully automated, enabling us to produce the bags with consistently high quality and minimise the number of defective goods. The production lines have been regularly modernised and upgraded to meet ever higher demands of the customers. With a view to diversify the range of the products and focus on good quality and reliable servise, we are now capable of making many types of bags with a wide range of quality and specifications for many applications.

Our initial capacity was set at 20 million bags per year. After 10 years of expansion and modernization the factory output increases nearly threefolds which now stands at 60 million bags per year.

As a core member of the VLC Group – a group having long and successful history in the chemical industry - especially the marine and industrial paint - and real estate business in Vietnam and Asia – VLC Packaging Company completely inherits the group's aspiring spirits, the desire for success and the vast experience in production management and business development that help drive VLC Packaging Company forward and establish a very strong foothold in the domestic market so far. Based on that foundation, we are expanding our business to the global market. VLC bags now are exported to various countries in Southeast Asia, Est Asia, America, and the EU.

With product quality and environment protection is our top priority (certified by ISO 9001 and ISO 14001) and customers satisfactions our business philosophy, VLC Packaging JSC determines to become a leading manufacturer of the PP bags industry.

1. PP WOVEN BAGS

The traditional PP bag is made from polypropylene resin which is first made into a plastic film, then drawn into flat tapes. The tapes are woven to make the fabric – main material for making PP woven bags.

Specifications

TYPE OF BAG	SIZE		MASS (g/m2)	COLOUR	TAPE (mm)	PRINT (colors/side)
	WIDTH (mm)	LENGTH (mm)				
Traditional PP bag	310-850	According to requirements	49 -150	According to requirements	2.2 - 3.1	1 side 6 colors 1 side 4 colors

Applications

Agricultural products (animal feeds, fertilizer, farming...), food industry, construction, raw material.

2. LAMINATED BAGS

Laminated bags are made from the woven fabric that are laminated inside or outside on one side or both sides depending on designed capacity and applications. The laminated bags are moisture proof and can be printed by the Flexo printers in maximum 6 colors to each size.

Specifications

TYPE OF BAG	SIZE		MASS (g/m2)	COLOUR	TAPE (mm)	PRINT (colors/side)
	WIDTH (mm)	LENGTH (mm)				
Laminated bags	310-850	According to requirements	65 -150	According to requirements	2.2 – 3.1	1 side 6 colors 1 side 4 colors

Applications

Agricultural products (animal feeds, fertilizer, farming...), food industry, construction, raw material.

3. BOPP BAGS

The BOPP bags are made from woven PP laminated with BOPP film to on one side or both sides. The BOPP laminated bags are moisture proof; have beautiful color and very sharp images. The colors and images are according to the customer requirement.

Specifications

TYPE OF BAG	SIZE		MASS (g/m2)	COLOUR	TAPE (mm)	PRINT (colors/side)
	WIDTH (mm)	LENGTH (mm)				
BOPP 1 side bags	500-850	1100	80 - 150	According to requirements	2.2 – 3.1	Max 9 colors
BOPP 2 side bags	310-850	1100	80 - 150	According to requirements	2.2 – 3.1	Max 9 colors

Applications

Agricultural products (animal feeds, fertilizer, farming...), food industry, construction, raw material.

4. KRAFT BAGS

Kraft bags are made by adding a kraft paper layer to the woven PP bags. The kraft layer provides resistance to tear, puncture, and moisture, it is also ideal for the flexo printing technology as ink become more adheresive to this specific surface. The image is also sharper and more beautiful.

Applications

Cement, raw material...

5. ADDITIONAL FEATURES:

- **Inserting LDPE, HDPE liner.**
- **Shaping block, gusseted bags.**
- **Anti-slip weaving (weft tape squeezing).**
- **Hemming with yarn, ultrasonic hemming, hemming with drawstring, hemming with liner stitch.**
- **Forming block bottom valve bag for filling by automatic machines.**
- **Die cut handle, stitch handle bags**
- **Bottom single/double fold with single/double stitch(s) with pp/cotton threat**
- **Packing as customer requirement**

6. PP WOVEN FABRIC

Tubular PP woven fabric roll is made from polypropylene resin and additives. The fabric roll is mainly used for bag production with the roll-to-roll flexo printers and automatic cutting and sewing machines.

Specifications

TYPE OF BAG	SIZE		MASS (g/m2)	COLOUR	TAPE (mm)	PRINT (colors/side)
	WIDTH (mm)	LENGTH (mm)				
Tubular PP woven fabric	300-850	2000-3000 metre / roll	49 - 150	According to requirements	2.2 – 3.1	Not printing
PP woven fabric sheet	620 - 1300	7000-10000 metre / roll	49 - 150	According to requirements	2.2 – 3.1	Not printing
Laminated PP woven fabric	620 - 1300	2000-3000 metre / roll	65 - 150	According to requirements	2.2 – 3.1	Not printing
Laminated PP woven fabric sheet	620 - 1300	5000-8000 metre / roll	65 - 150	According to requirements	2.2 – 3.1	Not printing
PP woven fabric sheet (small width)	620 - 1300	500-1000 metre / roll	65 - 150	According to requirements	2.2 – 3.1	Not printing

Applications

For producing large capacity bags used in construction, electricity and other heavy industries.
